MOZART

Mozart was born on 27 January 1756 in the town of Salzburg, in Austria. Mozart's father Leopold was a musician and he played violin. Mozart lived during the classical period. Leopold Mozart earned his living as a music teacher. He also played for the archbishop of Salzburg.

Wolfgang could play the harpsichord at the age of 3. By the time he was 5, he was writing tunes. He seemed to have music in his head. He could pick up a violin and play it, without being shown how. The children toured all over Europe performing for kings and queens.

Mozart was working on a piece of funeral music, called a Requiem, in the summer of 1791, he became ill. No one knows what was wrong with him. He died in December 1791.

The great composer was so poor he was buried with other poor people in a pauper's grave. No stone marked it.
